ABOUT ME

I'm very interested in Apple devices and software products. Passionate about new UX/UI solutions in the iOS ecosystem, fully understand Human Interface Guidelines. Always try to make clean, compact and scalable code. Self-educated. Motivated towards learning new technologies. I'm quickly getting into the workflow, have a positive attitude and energy.

PERSONAL APPS

SmartDrink

<http://appstore.com/smartdrink>

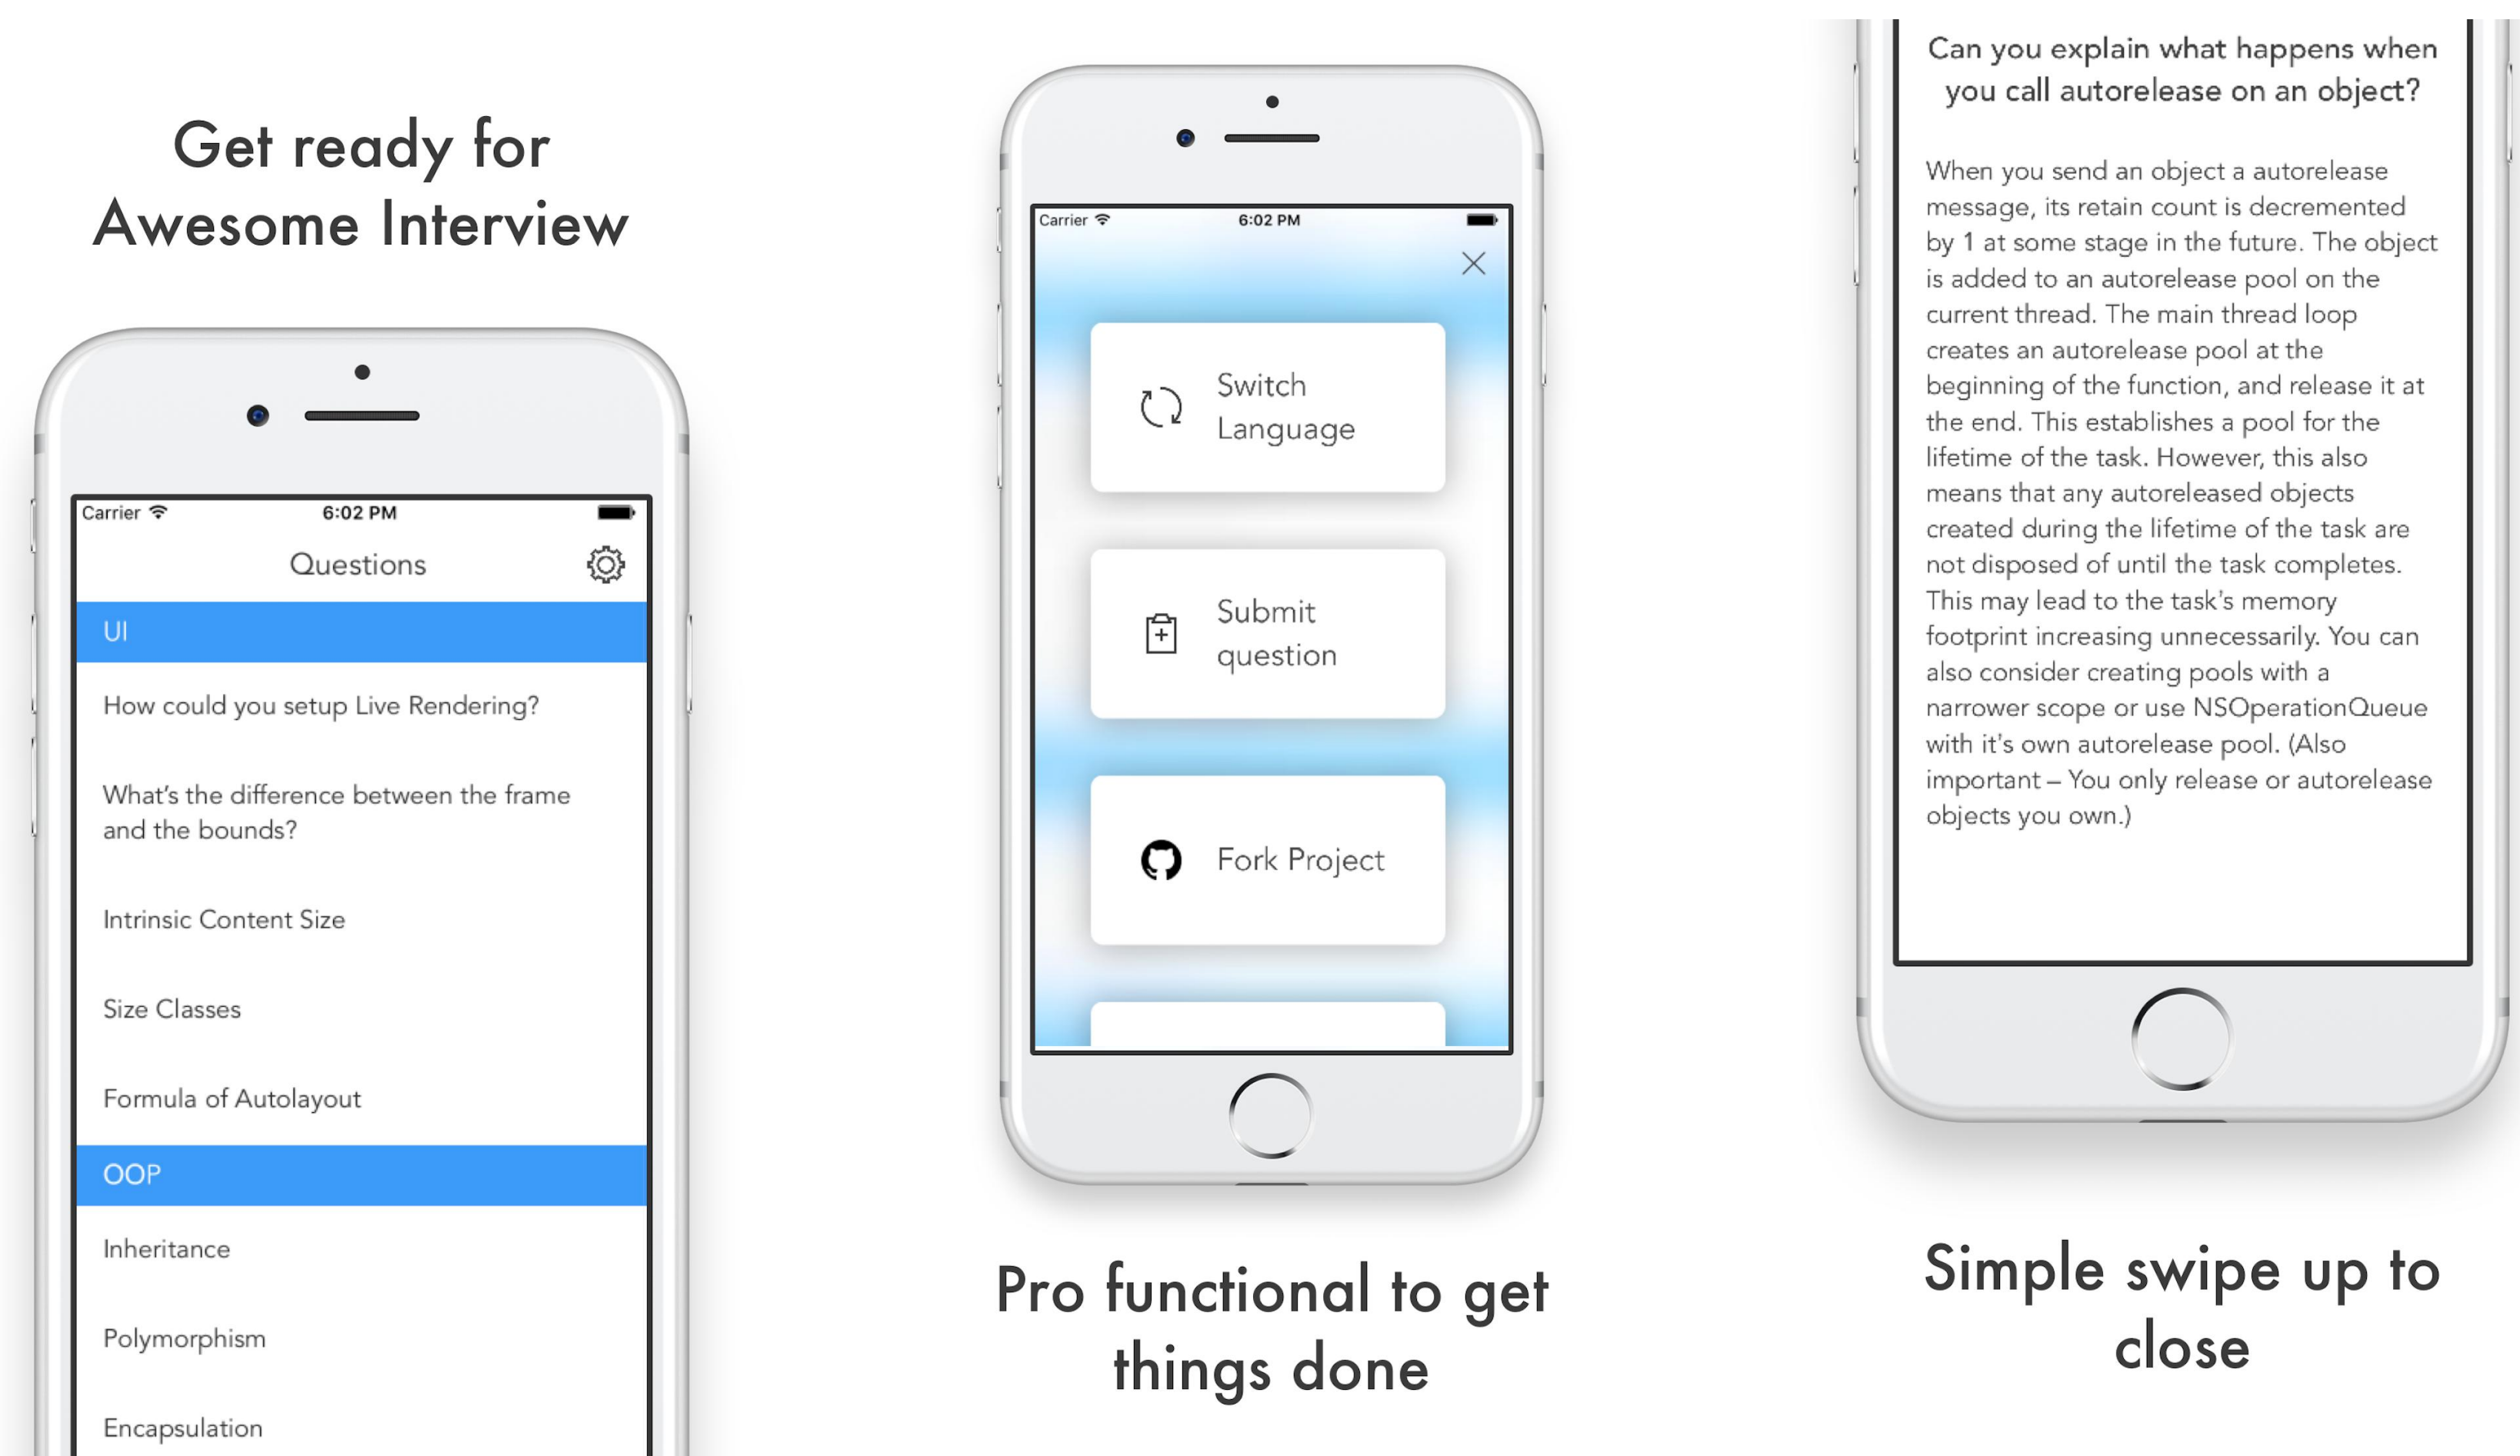

The application is designed to calculate the maximum concentration of ethanol in human blood (in ppm) after a predetermined number of instantaneous drinking of alcoholic beverages, as well as the timing of alcohol elimination from the body

Awesome Interview

<http://appstore.com/awesomeinterview>

'Awesome Interview' is the open source project which intends to help iOS-Developers to refresh their knowledge. There are lots of questions both in English and in Russian.

SmartRuler

<http://appstore.com/smartruler>

SmartRuler is rangefinder app which allows you to measure the approximate distance and height of an object. The handy camera measuring tool performs non-contact distance measurement by camera lens and hardware sensor of device.
